**PATIENT
ACCESS**

WHEN ACCESS IS COMPLEX, EXPERIENCE MATTERS.

Bringing medicines across markets, supporting clinical trials and reaching patients with unmet needs requires more than product supply.

It requires sourcing expertise, regulatory understanding, validated supply infrastructure and reliable execution across markets.

GNH brings these capabilities together to accelerate clinical development, navigate access challenges and reach patients worldwide.

INFRASTRUCTURE**

FROM DEVELOPMENT. TO GLOBAL ACCESS. TO **PATIENTS.**

GNH integrates clinical supply, international sourcing and patient access capabilities through one platform—helping biopharma companies move from development to access and ultimately to patients.

DEVELOPMENT

Accelerate clinical programs.

Supporting Phase I–IV clinical development through comparator sourcing, RLD access and clinical supply solutions.

ACCESS

Navigate challenging requirements.

Connecting pharmaceutical requirements with trusted sourcing capabilities and supply solutions across 180+ countries.

PATIENTS

Expand access to medicines.

Enabling Named Patient, Early Access and Managed Access pathways beyond conventional commercial availability.

GLOBAL REACH. INTEGRATED CAPABILITIES. ONE STRATEGIC PARTNER.

ACCELERATING CLINICAL DEVELOPMENT.

Clinical programs depend on the timely, reliable and compliant supply of medicines across increasingly complex markets.

GNH supports Phase I–IV clinical development by connecting sponsors and clinical supply teams with comparator and Reference Listed Drug sourcing capabilities across 180+ countries, supported by validated pharmaceutical supply infrastructure.

GLOBAL COMPARATOR SOURCING

Access market-specific comparators and reference products through GNH's international sourcing capabilities.

REFERENCE LISTED DRUGS

Source RLDs from regulated markets with supporting documentation, traceability and supply chain integrity.

CLINICAL SUPPLY SOLUTIONS

Support study requirements including receipt, documentation, condition, reference standards and temperature-controlled supply.

WHEN CONVENTIONAL ACCESS ENDS, OUR GLOBAL NETWORK BEGINS.

Pharmaceutical requirements do not always follow simple supply pathways. Products may be difficult to source, limited by market availability or require specialised regulatory and supply-chain execution.

GNH brings together international sourcing, regulatory understanding and validated supply infrastructure to solve pharmaceutical access challenges across 180+ countries.

GLOBAL SOURCING

Access medicines across international markets through trusted, traceable and compliant supply pathways.

COMPLEX REQUIREMENTS

Navigate orphan medicines, limited-availability products and specialised requirements where conventional channels may be insufficient.

GLOBAL EXECUTION

Connect challenging requirements with the regulatory understanding, supply infrastructure and international capabilities to move medicines.

FROM LIMITED AVAILABILITY TO EXPANDED PATIENT ACCESS.

Patients may need access to medicines before commercial launch, outside approved markets or where conventional supply pathways are unavailable.

GNH helps biopharma companies navigate specialised access requirements through Named Patient, Early Access and Managed Access solutions supported by international sourcing and validated supply infrastructure.

NAMED PATIENT ACCESS

Supporting compliant access to medicines for individual patient requirements across international markets.

EARLY ACCESS

Helping biopharma companies establish pathways for eligible patients to access medicines before conventional commercial availability.

MANAGED ACCESS

Supporting structured access programs through coordinated sourcing, supply and international execution.

BUILT ON **EXPERIENCE.** PROVEN THROUGH **EXECUTION.**

Behind every GNH access solution is more than two decades of pharmaceutical experience, international capability and quality-led supply infrastructure.

YOUR CHALLENGE. OUR **GLOBAL ACCESS** INFRASTRUCTURE.

Whether accelerating a clinical program, navigating pharmaceutical access or expanding patient access, GNH brings together the international capabilities, experience and infrastructure required to move forward.

From development to global access to patients, we work alongside biopharma companies to turn challenging requirements into executable solutions.

BRING US YOUR COMPLEX ACCESS CHALLENGE.

Discuss your next clinical development, global access or patient access requirement with GNH.
